Professor ALLEYNE NICHOLSON on the Palaeontological Significance of the Migrations of Animals, .............................. 1
Mr RALPH RICHARDSON on Phenomena of Weather Action and Glaciation exhibited by the Alps of Switzerland and Savoy, ......... 11
Mr JOHN HENDERSON on the Wardie and Granton Series of Sandstones and Shales, ........................................... 24
Mr RALPH RICHARDSON on Phenomena of Glaciation exhibited by the Rocks of Corstorphine Hill, near Edinburgh, .................. 31
Dr DANIEL HAHN on the Phosphorescence of Minerals, ...................... 41
Mr THOMAS SMYTH on the Occurrence of Chalk-Flint Nodules and Greenstone Boulders in the Post-Pliocene Sands (stratified) at Marionville, Edinburgh, ........................................... 50
Dr DANIEL HAHN on the Want of a systematic universal Nomenclature in Mineralogy, .................................................. 55
Mr G. H. KINAHAN on Metamorphism and Vulcanicity, ...................... 59
CATALOGUE of the BRACHIOPODA of the LOTHIANS and FIFE—
1. Introduction by Mr THOMAS DAVIDSON, F.R.S., ....................... 68
2. Introduction by Mr ALEXANDER SOMERVAIL, ......................... 71
3. The Catalogue, .............................................................. 81
Mr G. J. PRIMROSE GRIEVE on Metamorphism and Vulcanicity, .......... 87
Mr ALEXANDER SOMERVAIL on the Glacial Phenomena of Scotland, with special reference to the recent works of Dr CROLL and Mr JAMES GRIEVE, .......................................................... 88
Mr MILNE-HOME'S Address as President of the Society, .................... 98
Mr RALPH RICHARDSON on Glaciated Rock Surfaces (displaying Corals) near Bathgate, recently quarried away, ......................... 108
Mr RALPH RICHARDSON on a Striated Erratic recently exposed at Granton, with observations on the requisites for determining the Parent Rocks of Erratics, ..................................................... 109
Mr WILLIAM FERGUSON of Kinhordy on the Occurrence of Chalk-Flints and Greensand Fossils in Aberdeenshire, ...................... 112
Dr W. T. BLACK on Rolled Pebbles from the Beach at Dunbar, ............... 122
Mr JAMES MELVIN, Bonnington, on the Nature and Origin of the Surface or Vegetable Soil, and its Influence on Geological Phenomena, .......... 124
Mr ANDREW TAYLOR on Metamorphism and Vulcanicity as displayed by the Rocks of the Edinburgh District, ......................... 136
Death of Dr JAMES BRYCE, ..................................................... 139
Mr RALPH RICHARDSON'S Obituary Notice of Dr JAMES BRYCE, .................. 141
Mr C. W. PEACH on the Fossil Plants found in the Old Red Sandstone of Shetland, Orkney, Caithness, Sutherland, and Forfarshire, .......... 148
Dr W. LAUDER LINDSAY on Museum Specimens of Native Scottish Gold, 153
Mr FREDERICK SMITH on the Phenomena and Geological Teaching of the recent Great Flood in the Devon Valley, ......................... 169
## CONTENTS

Excursions to Alnwick Hill, Camps Quarries, and Moorfoot Hills, .................................................. 179
Mr **MILNE-HOME'S Address as President of the Society, and Obituary Notice of Sir Richard J. Griffith, Bart.,** .................................................. 181
Mr **ALEXANDER SOMERVAIL on the Higher Summits of the Pentland Hills,** .................................................. 191
Mr **JAMES WILSON on the Importance of Palaeontological Evidence in Geological Studies,** .................................................. 200
Mr **THOMAS D. WALLACE on the Structural Geology of Strathnairn,** .................................................. 204
Mr **RALPH RICHARDSON'S Obituary Notice of Dr Page, formerly President of the Geological Society of Edinburgh,** .................................................. 220
Map of the Igneous Rocks within the City of Edinburgh, by Messrs **JOHN FERGUSON and JOHN HENDERSON,** .................................................. 222
Mr **JOHN HENDERSON on the Structure and Arrangement of the Rocks of Arthur's Seat,** .................................................. 222
Mr **RALPH RICHARDSON'S Obituary Notice of Professor Nicol,** .................................................. 245
Mr **ALEXANDER SOMERVAIL on Roches Moutonnees and other Points of Geological Interest in the Valley of the Urr, Kirkcudbrightshire,** .................................................. 247
Mr **RALPH RICHARDSON on the Connection between Geology, Meteorology, and Agriculture, as illustrated by the leading Agricultural Districts of Scotland,** .................................................. 251
Mr **ANDREW TAYLOR on the Petrology of Arthur's Seat,** .................................................. 264
Mr **W. IVISON MACADAM on the Chemical Composition of a Nodule of Ozokerite found at Kinghorness,** .................................................. 272
Excursion to Pentland Hills, .................................................. 277
Mr **ANDREW TAYLOR on the Crag Structure on Southern Slopes of Queen's Park,** .................................................. 279
Mr **W. IVISON MACADAM on the Chemical Composition of Rocks from Salisbury Crags (South Side),** .................................................. 288
Mr **WILLIAM M'DIARMID on the North-East Coast of Norfolk,** .................................................. 292
Mr **THOMAS STOCK on a Section recently exposed near Straiton,** .................................................. 294
Mr **JOHN YOUNG on Scottish Carboniferous Microzoa,** .................................................. 299
Mr **H. M. CADELL on the Volcanic Rocks of the Borrowstounness Coal-field,** .................................................. 304
Mr **JAMES MELVIN on the Evidence the Vegetable Soil affords as to Geological Time,** .................................................. 326
Mr **THOMAS D. WALLACE on the Geology of Rathven and Enzie,** .................................................. 331
Mr **D'Arcy W. THOMSON on the Ulodendron and Halonia,** .................................................. 341
Mr **JOHN HENDERSON on some recently discovered Fossiliferous Beds in the Pentlands,** .................................................. 353
Mr **MILNE-HOME'S Valedictory Address for Session 1879–80,** .................................................. 357
Excursion to Beith District, .................................................. 365
Excursion to Borrowstounness District, .................................................. 366
