INDEX.

Minerals and Scottish Localities are grouped under the headings "Minerals" and "Scotland."

Ægirine, Occurrence in Scotland, 273.
Agate, Colouring matter of, 220.
Age of the Earth, 240, 275.
Alkalies, Percentage of, in sands and sandstones, 54.
Almond River, Buried channel of, 194.
Analcite-Diabase from Gullane Hill, 326.
Analcite, Origin of, 381.
Analyses:—
  Clay, Boulder (Mackie), 60.
  Diabase (J. Macadam), 134.
  "Diabase-Porphyry" (Mackie), 56.
  Diorite (Mackie), 55.
  Granite (Mackie), 54, 111, 112.
  Levyne (Heddle, quoted), 342.
  Marl, Houston (J. Macadam), 134.
  Metamorphic Gneisses, Schists, etc. (Mackie), 57, 111.
  Oil Shale (D. R. Steuart), 120.
  Quartz-Porphyry (Mackie), 56.
  Serpentine (Mackie), 56.
  Sand—River, Sea, and Blown (Mackie), 59.
  Sandstones (Mackie), 58, 59.
  Serpentine (Mackie), 56.

Andesitic Lavas of Lorne, Association of Tuffs with, 57.
Anticlinal in the Lothians Shalefield, 124, 125, 126, 127, 147, 152, 155.
Ardmucknish, Argyll, Spherulite Dykes of, 363.
Argyll, Duke of, Obituary Notice of, 176.
Arthur’s Seat, Turgite of, 1, 206.
Ash-Necks of the Lothians and Fife, 148, 162.

—— —— and D. Tait, On the Occurrence of True Coal Measures at Port Seton, East Lothian, 311.
Balmahe-Aberfoyle District, Lower Old Red Sandstone of, 315.
Bandé Structure in Igneous Rocks of Skye and Rum, 346, 347.
Basalt, Spherulitic, of Ardmucknish, 363.

Bennie, James, Obituary Notice of, 187.
Bones, mammalian, Discovery of, at Hailyes Quarry, 27.
Boulder Clay, Analysis of, 60.
Breccia, Igneous, of the Lui, near Braemar, 336.
Breccias (Crush-Breccias) of Rum, 347.
Broxburn Shalefield, 143.
Buried channel of the Almond, 194.
Burntisland Shalefield, 192.

Cadell, H. M., On the Geology of the Oil Shalefields of the Lothians, 118.
—— —— Note on the Buried River Channel of the Almond, 194.
Caledon, Replacement of, by Turgite, 206.
Carbonate of Lime in the Lower Carboniferous, Chemical origin of, 3 n.
Carboniferous Formation, Sections of, 2, 61, 270, 272, 352, 353, 355, 357, 376, 377, 378.
—— —— Shalefields of, 116.
Cheviot Hills, Contact Metamorphism by the Granite of the, 18.
—— —— Evidence for Glacier-dammed Lakes among the, 226.
Clay, Boulder, Analysis of, 60.
—— Shell-bearing, in Jutland, 86.
—— —— in Kintyre, 76.
Coal Measures, Occurrence at Port Seton, 361.
Coal Mining in the Musselburgh Coalfield, 379.
Cobalt, Traces of, in the Sandstones of the Moray Firth Area, 256.
Colouring Matter of Agate, 220.
Copper, Traces of, in the Sandstones of the Moray Firth Area, 256.
Crampton, C. B., The Limestones of Aberlady, Dunbar, and St Monans, 374.
Crustacea, Scottish Carboniferous, 372.
Currie, James, On New Localities for Levyne in the Faeroes and Skye, 341.
—— —— The Stassfurt Salt Industry, 403.
Dalmeny Shalefield, 159.
Dykes, Spherulitic, of Ardmucknish, Argyll, 363.
Dynamics of Faulting, 387.
Earth, Age of the, 240, 275.
Edinburgh, Exposures of Rock in, 2, 267.
Enstatite, Effects of Metamorphic Action on, 32.
Erratics, in Boulder Clay, Edinburgh, 9.
—— in Eastern Moray, 91.
—— in Kintyre, 77.
—— Uplift of, above present level of parent rock, 97.
Faeroes, Localities for Levyne in, 341.
Faulting, Dynamics of, 387.
Faults in the Lothian Shalefield, 124, 143, 152, 153, 159.
Felsite, Spherulitic, of Glen Feshie, 114.
Flora of Inland Salt Regions of Germany, 403.
Gas in Salt at Stassfurt, 407.
—— in Shalefields of the Lothians, 147.
Glacier-dammed Lakes of the Cheviots, 226.
Glen Feshie, Spherulitic Felsite of, 114.
Goethite, Occurrence at Ratho, 209.
GOODCHILD, J. G., Hematite on Arthurs Seat (Abstract), 1. [See also p. 206.]
—— Some Recent Exposures of Rock in Edinburgh, 2.
—— ——— John Henderson, 165.
—— ——— The Geognosy of Scottish Tourmalines, 182.
—— ——— On some Pseudomorphs after a Lime-Soda Felspar, 260.
—— ——— Further Remarks on some Recent Exposures of Rock in Edinburgh, 266.
—— ——— On unconformities and Palaentological Breaks in Relation to Geological Time, 275.
Granites, Analyses of, 54, 91, 111, 112.
Granite Veins, Chemical Composition of, compared with that of probable original magma, 107.
—— Differences in chemical composition between the central and marginal zones, 93.
—— Movement of potash to periphery and of soda to centre, 108.
Greenockite, New Locality for, 208.
Hailes Quarry, Discovery of Mammalian Bones at, 27.
Hebrides, Inner, Tertiary Crust Movements of, 344.
Henderson, John, Obituary Notice of, 165.
HINSMAN, L., Note on Specimens of Spherulitic Felsite from Glen Feshie, 114.
HORNE, JOHN, Obituary Notice of Mr Bennie, 187.
—— ——— Obituary Notice of Mr J. W. Kirkby, 231.
Houston Marls, Description and Analysis of, 182, 184.
Human Remains associated at, Hailes with those of Red Deer and Ox, 197.
Ice, Course of, in Aberdeenshire and Kincardineshire, 222.
—— in Cheviots, 226.
—— in Moray Firth Basin, 91.
Iron Oxides as colouring material in Rocks, 204.
—— Scottish Ores of, 200.
JESSEN, A., On the Shell-bearing Clay in Kintyre, 76.
Joly, Prof., Criticism of his views as to the determination of the Age of the Earth from the Saltness of the Sea, 240.
Jutland, Shell-bearing Clay in, 86.
KERR, —, Note on Agate Specimens from Monzie, 287.
Kintyre, Shell-bearing Clay in, 76.
KIRKBY, JAS. W., Note on the Ostracoda from the Scotsman office section, 15.
—— ——— On Lower Carboniferous Strata and Fossils at Randerstone, near Crail, Fife, 61.
—— ——— Obituary Notice of, 231.
KYNASTON, HERBERT, Notes on Contact Metamorphism round the Cheviot Granite, 18.
—— ——— On some Tuffs associated with the Andesitic Lavas of Lorne, 87.
Lakes, Glacier-dammed, in the Cheviots, 226.
Lead, Traces of, in the Sandstones of the Moray Firth area, 256.
Levyne, Minerals associated with, 342.
—— in the Faeroes and Skye, Localities for, 341.
INDEX.

415

Lime, Percentage of, in Sands and Sandstones, 42.
Limestones of Aberlady, Dunbar, and St Monans, 374.
Limonite, Formation of, 205.
Lorne, Tuffs associated with Andesitic Lavas of, 87.
Lothians, Oil Shalefields of, 116.
Lui, Igneous Breccia of the, 336.
MACKIE, W., Seventy Chemical Analyses of Rocks (chiefly from the Moray Firth), with Deductions, 33.
— — Some Notes on the Distribution of Erratics over Eastern Moray, 91.
— — On Differences in Chemical Composition between the Central and Marginal Zones of Granite Veins, with further Evidence of Exchanges between such Veins and the Contact Rocks, 98.
— — On the Saltiness of the Sea in relation to the Geological Age of the Earth, 240.
— — Note on the Occurrence of Traces of the Heavy Metals in the Sandstone of the Moray Firth Basin, 256.
Magnesium Salts of Stassfurt, Export to Scotland, 411.
Mammalian Remains from Hailes Quarry, 27, 197.
MARTIN, ROBERT, Coal Mining in the Musselburgh Coal-Field, 379.
Metamorphism, 18, 19.
Mid Calder Shalefield, 140.
MILNE, JOHN, On Old Red Sandstone in Aberdeen and Neighbourhood, 221.
Minerals:
Agirine, 273.
Agate, 220, 224, 227, 327.
Analcite, 328.
Apatite, 330.
Barytes, 93, 237, 320.
“Bitumen,” 154.
Feldspar, 260, 273, 331.
Galena, 157.
Garnet, 40, 100.
Gastite, 209.
Greenockite, 208.
Hematite, 207.
Hornblende, 94.
Hypersthene, 93.
Jasper, 237.
Labradorite, 260.
Leyne, 342.
Limonite, 206, 207.
Marcasite, 211.
Millerite, 211.
Mispickel, 212.
Nepheline, 273.
Orthoclase, 273.
Oxocerite, 147.
Petroleum, 147.
Pyrites, 211, 334.
Pyrrhotite, 214.
Rubinglimmer, 208.
Rutile, 93, 94.
Sphene, 35, 36, 92, 94.
Turpite, 208.
Vivianite, 27, 212.
Moray, Erratics of, 91.
Nepheline, Occasional Origin of Analcite, 331.
Nepheline-Agirine Pegmatite, Occurrence in Sutherland, 273.
Nickel, Traces of, in the Sandstones of the Moray Firth Basin, 256.
Obligatory Notices:
— Duke of Argyll, 176.
— James Bemie, 187.
— John Henderson, 185.
— J. W. Kirkby, 231.
— Jas. Simpson, 32.
Oil Shale, Physical characters of, 118.
— Ultimate composition of, 120.
Oil Shalefields of the Lothians, 116.
Old Red Sandstone in Aberdeen, 221.
— — of Balmaha and Aberfoyle, 315.
Ostracoda, Edinburgh, 15.
— Fife, 61.
— Kintyre, 77.
Ox, Bones of, at Hailes Quarry, 197.
Pegmatite, A suggested definition of, 183.
Petroleum, Natural, in the Lothians, 147.
Philpstown Shalefield, 151.
— — Occurrence of Coal Measures at, 351.
Potash, Movement of, to the margin of Granite Veins, 168.
— — occurrence in Germany, 408.
— — salts of Stassfurt, Export to Scotland, 410, 411.
— — Output of, 404.
Pseudomorphs, 260, 327, 328.
Pumperston Shalefield, 137.
Pyrites, as colouring matter of Clay, 203.
— from Stanley, Renfrewshire, Analysis of, 211.
Randerstone, Fossiliferous Strata of, 61.
Red Deer, Bones of, at Hailes Quarry, 197.
Rubinglimmer, suggested identification with Turpite, 208.
Rum, Crush-Breccias of, 347.
Gneisses of, 346.
— — Order of Intrusion of Igneous Rocks of, 350.
Salt Industry of Stassfurt, 403.
Saltness of the Sea in relation to the Geological age of the Earth, 240.
Sandstones of the Moray Firth Basin, Traces of the Heavy Metals in, 256.
Scotland: Geology, Mineralogy, and Petrology of—
   — Aberdeenshire (Aberdeen), 221.
   — (Braemar), 337.
   — Argyllshire (Ardmucknish), 363.
   — (Kintyre), 76.
   — (Loch), 87.
   — Ayrshire (Dreghorn), 260.
   — (Portsoy), 98.
   — Berwickshire (Cove), 206.
   — (Musselburgh), 379.
   — (Pentlands), 220.
   — (Ratho), 209.
   — Fifeshire (Elie), 206.
   — (Kirkcaldy), 206.
   — (Randerstone), 61.
   — (St Monans), 374.
   — Haddingtonshire (Aberlady), 206, 374.
   — (Dunbar), 206, 374.
   — (Garleton Hills), 206.
   — (Gullane Hill), 220.
   — (North Berwick), 207.
   — (Port Seton), 351.
   — Inverness-shire (Glen Feshie), 114.
   — (Elle), 206.
   — (Kirkcaldy), 206.
   — (Randerstone), 61.
   — (St Monans), 374.
   — Haddingtonshire (Aberlady), 206, 374.
   — (Dunbar), 206, 374.
   — (Garleton Hills), 206.
   — (Gullane Hill), 220.
   — (North Berwick), 207.
   — (Port Seton), 351.
   — Inverness-shire (Glen Feshie), 114.
   — (Elle), 206.
   — (Kirkcaldy), 206.
   — (Randerstone), 61.
   — (St Monans), 374.
   — Inverness-shire (Glen Feshie), 114.
   — (Strathdearn), 10.
   — Linlithgowshire, 194.
   — Lothians, 116.
   — Morayshire, 91, 256.
   — (Rothes), 95.
   — (Aberfoyle and Balmaha), 315.
   — Perthshire (Monzie), 237.
   — Renfrewshire (Gourrock), 208.
   — (Stanley), 211.
   — Stirlingshire (Falkirk), 212.
   — (Sauchie), 214.
   — Sutherlandshire (Cnoc na Sroine), 273.
   — West Calder Shalesfield, 128, 136.
   — Zonal forms of Fossils, Lists of, 288, 291, 293, 294, 296, 302, 303, 305, 308, 310, 311, 312.

Simpson, James, Obituary Note on, 32.
Soda, Movement of, towards the centre of granite veins, 108.
Spherical Structure, List of Observed Occurrences, 115.
   — — in Basalt Dykes of Ardmucknish, 363.
   — — in Felsite of Glen Feshie, 114.
   — Strachan, J., Notes on some Agates from the Pentlands (Hillend), 220.
   — Strathdearn, Geology of, 10.
   — — Glaciation of, 13.
   — Tertiary Crust Movements of the Inner Hebrides, 344.
   — Torridonian period, Climate of, 42, 53.
   — — Sandstones, Source of the material of, 41.
   — Tourmalines, Scottish, Geognosy of, 182.
   — Triassic Sea, Composition of, 406.
   — Tuffs associated with Andesitic Lavas of Lorne, 87.
   — Turrite, Formation of, 205.
   — — Occurrence in Scotland, 206.
   — Unconformabilities in relation to Geological Time, 275.
   — Vivianite, Occurrence at Hailes Quarry, 27.
   — Wallace, Thomas, Additional Notes on the Geology of Strathdearn and adjoining district of the Aviemore Railway, 10.
   — West Calder Shalesfield, 128, 136.
   — Young, Robert, An Analcite Diabase and other Rocks from Gullane Hill, 326.
LIST OF OFFICE-BEARERS
OF THE
EDINBURGH GEOLOGICAL SOCIETY,
FOR SESSION 1900-01,
BEING THE SIXTY-SEVENTH.

President.

Vice-Presidents.
John S. Flett, M.A., D.Sc., M.B., C.M.
Thomas D. Wallace, Rector of High School, Inverness.

Honorary Secretary.—James Currie, M.A., F.R.S.E.

Assistant-Secretary.—John A. Johnstone.

Librarian.—David Tait, H.M. Geol. Survey.

Assistant-Librarian.—Robert B. Stalker.

Treasurer.—John Forgan, S.S.C., 20 George Street.

Council.
James R. Reid.
Surgeon-Major W. G. Black.
Robert Kellock.
H. M. Cadell, B.Sc., F.R.S.E.
James Bisset, F.R.S.E.

Auditors.—T. K. Farquharson and R. C. Millar.

*The authors alone are responsible for the facts and opinions contained in their respective papers.*
Orders for the Society’s Publications, and all printed matter intended for the Library, should be addressed to the Honorary Librarian, Mr David Tait, 5 St Andrew Square. All communications for the Secretary should be addressed to the Society’s Library, No. 5 St Andrew Square.

The Edinburgh Geological Society was founded in 1834; but it did not publish Transactions till 1868. Fellows pay an Entrance Fee of 10s. 6d., and an Annual Subscription of 12s. 6d.; or a single payment may be made for Life of £6:16:6. Life Members and Fellows who have paid Annual Subscriptions to the amount of Two Guineas may receive the Society’s Diploma on payment of a fee of 7s. 6d. Candidates for election must be nominated by two Ordinary Fellows.

The Society is supported solely by the Annual Subscriptions of its Ordinary Fellows, and derives no pecuniary aid from Government.
