INDEX.

Aberdour, Lower Carboniferous Rocks near, 364.
Allanite in the Granite of the North of Scotland, 216.
Altered sediments on Inchcolm, 131.
Analyses of minerals and rocks, 40, 106, 204, 280, 358, 396, 397, 417, 418, 419.
Andesite, Breciated, 69.
—— of Ben Nevis, 69.
Argyllshire Highlands, New Structures in, 363.
Assyntite, a new rock name, 403.
Avon, Relation of Don to, at Inchrory, 227.
—— Results of, 148.
Banffshire Schists, Evidence of Contemporary Volcanic Action in, 94.
Basalt of Dalmeny Type on Inchcolm, 122.
Ben Nevis, Occurrence of Volcanic Tuffs in, 69.
—— Andesite of, 69.
Bibliography of John George Goodchild, 342.
Blue-ground and Allied Rocks in South Africa, 361.
Blithewood, Deep bore at, 170.
—— (Second Communication), 376.
—— Chemical Analyses of, 417.
—— On the Use of the Name, 414.
Boulders in Gravel at Woodhall Colliery, Pencaitland, 149.
Briggs, H., Modern Practice in the Dressing of Lead Ores, 179.
—— Notes on the Floatation Processes of Ore Extraction, 322.
Burdiehouse Limestone, 77, 78.
Caithness, Cretaceous Fossils in, 318.
Calamites as coal-formers, 79, 88.
Cannel Coal, Formation of, 81, 86.
Carraig, 130.
Chemical Analyses of Borolanite and Related Rocks, 417.
Cloth, C. T., with W. Wilson, G. W. Lee, and D. Tait, The Recently Exposed Section South-east of Portobello, 193.
Coal Formation, A Theory of, 73.
Cromarty Island, 180.
Crampston, C. B., Fossils and Conditions of Deposit, a Theory of Coal Formation, 73.
Cretaceous Fossils in Caithness, 318.
Cromaltite, a new rock name, 394.
Currie, J., The Mineralogy of the Ferroes, arranged Topographically, 1.
Diamond-bearing Blue-ground and Allied Rocks of South Africa, 361.
Distribution and Significance of Deviations from the Normal Order of Crystallization, etc., 247.
—— of Micropegmatite in Granite, 247.
Don, Relation of, to the Avon, 227.
Dressing of Lead Ores, Modern Practice in, 179.
Earthquake, The Hereford, 118.
—— Waves, 115.
Earthquakes, Galitzin’s curves of artificial, 114.
East and West Dyke on Inchcolm, 130.
Edge Coal Series, 183.
Egg-Shaped Stones Dredged from Wick Harbour, 135.
Eyed Gneiss, Formation of, 375.
Ferroes, analyses of minerals, List of references to, 8.
Faeroes, Early accounts of mineralogy of, 2.
— figures of crystals, List of references to, 9.
— Index of localities of minerals, 64.
— Index of minerals of, 66.
— Literature dealing with, 6.
— Map of mineral localities (Plate II.), 10.

— Mineralogy of, arranged Topographically, 15.

Falkirk, Artesian wells near, 170.
False-bedding, Curved, 197.
Faua of the Burdiehouse Limestone, 77.
Felsite Sill near Aberdeen, 230.
Felspathoidal Rocks, Terminology of, 377.

Floatation Processes of Ore Extraction, 322.

Fossils:

Anthracomya, 76, 77.
Archaeocidaris, 77.
Aviculopodites, 74, 82.
Calamites, 78, 80, 81.
Carbonia, 76, 77.
Carbonicola, 78, 82.
Coreides, 320.
Cricoceras, 320.
Desmoceras, 320.
Dictyocysta, 354.
Dimorphoceras, 142.
Diplolabis, 357.
Dreissenina, 76.
Equestrites, 80.
Glyptioceras, 142.

Gonioceras, 74, 82, 85, 142.
Hamites, 320.

Heterangium, 354, 357.
Hippurites, 78.
Lepidodendrea, 79, 86.
Lepidodendron, 357.
Lingula, 75, 77, 194.
Lithostrotion, 73, 74.
Lonsdalea, 73.
Navadites, 78, 77.
Orthoceras, 77.
Paludina, 77.
Pedicin, 86.
Plagiocystites, 320.

Potamidites, 320.
Productus, 324.
Spirorbis, 76, 77.
Spyricidae, 74, 82.
Zygopterus, 357.

Fossils and Conditions of Deposit, a Theory of Coal Formation, 73.
Fracture planes in sandstone, 197.

Galitzin's Curves of artificial earthquakes, 114.

Gemmell, A., Chemical Analyses of Boralane and Related Rocks, 417.

Geology and Art, 223.

Gibb, A. W., On the Relation of the Don to the Avon at Inchinnery, 227.
— — On a Felsite Sill near Aberdeen, 320.

Goodchild, John George, Obituary Notice of, 331.

Granite-Gneiss Contacts, Some Scottish, and their Interpretation, 365.

Granton Sandstone, 102.

Haltes Sandstone, 102.

Horizontal pendulum described, 109.

Horblende schist, 26.

Horblende granites, 254.

Humic acid in soil, 81.

Inchcolm, The Geology of, 121.

Inchmickery, 130.

Inchrory, Relation of the Don to the Avon at, 227.

Jurassic Rocks in Caithness, 138.

Kennetpans, Borhole at, 170.

Kirkland Neuk, Deep bore at, 170.

Knotz, C. G., Recent Progress in Seismology, 108.

Lead Ores, Dressing of, 179.

Leducrite, a new rock name, 384.

Lee, G. W., On the Goniatite Bed near Donibristle, 142.
— — with W. Wilson, C. T. Clough, and D. Tait, The Recently Exposed Section South-east of Portobello, 193.

Loovad Quarry, Concretions in sandstone at, 196.

Lime-silicate rock from Balmoreal, 368.

Limestone, Burdiehouse, 77, 78.

Middle Skateraw, 73.

Lit-par-lit injection, 369, 371, 374.

Logie Works, Dundee, Deep bore at, 169.

Lossie Valley, Note on Two Pieces of Fragmental Volcanic Rocks from, 71.

Lower Carboniferous Rocks near Aberdour, 364.

Mackie, W., Allanite in the Granite of the North of Scotland, 216.
— — Distribution and Significance of Deviations from the Normal Order of Crystallisation, etc., 247.

Meadowbank, Artesian well at, 170.
INDEX.

Micropegmatite, Distribution and Significance of, in Granite, 247.
Millstone Grit, 146.
Mineralogy of the Ferries, arranged Topographically, 1.
Minerals of the Ferries, Early accounts of, 2.
——— Index of, 66.
——— Localities of, 64.
Minerals, New occurrences and special features of (see also Minerals of the Ferries):
— Albite, 128, 399, 399, 399, 401.
— Albito-augite, 399, 395, 403.
— Allanite, 216, 217.
— Analcite, 127, 207.
— Anorthite, 368.
— Anorthite-epidote, 368, 405.
— Anorthite, 368, 405.
— Garnet, 192, 192.
— Hornblende, 71, 208, 403, 405.
— Melanite, 205, 387, 388, 390, 404, 419.
— Mesotype, 4.
— Nepheline, 400, 402.
— Prehnite, 208.
— Pseudo-leucite, 208, 392, 400, 408, 410.
— Pseudo-nepheline, 211, 389, 390.
— Pyroxene, 205.
— Rutile, 131.
— Spinel, 402.
— Spinel, 133.
— Spreustein, 210, 403, 409.
— Titanite, 205, 261, 288, 403.
— Zoisite, 290.

Neuffen, Deep bore at, 174, 176.
New Structures in the Argyllshire Highlands, 363.
Niddrie, Deep bore at, 169.

Obituary Notice of John George Goodchild, 331.
Oil-bearing Shale, New Localities for, near Edinburgh, 102.
——— Shales, Analyses of, 106.
Old Red Sandstone, Outliers of, in the Neighbourhood of Selkirk, 351.
Order of Crystallization, Deviations from the Normal, 247.
Ore-concentrators, 187.
Ore-crushers, 181.
Ore Extraction, Notes on the Flotation Processes of, 322.
Ore-screening, 184.
Outliers of Old Red Sandstone in the Neighbourhood of Selkirk, 351.
Paruschkowitz, Deep bore at, 174, 175.
Pettycur, Fife, Plant-bearing Rocks at, 353.
Pierite of Inchcolm, 128.
Portobello, Section South-east of, 193.

Pregny, Deep bore at, 174.
Pyriform Shales, Origin of, 75.

RICHARDSON, R., Geology and Art, 233.
Rittinger’s Formula, 188.
Rose Bridge Colliery, Underground temperature at, 171.

Schladbach, Deep bore at, 173.
Scotland, Geology, Mineralogy, and Petrology of:
— Aberdeenshire (Aberdeen), 230.
— (Balmoral), 365.
— (Kennedy), 374.
— (Kennethmont), 217.
— (Rablaslaw), 264, 314.
— (Tillyfour), 370.
Argyllshire (Ballachulish), 283.
— (Spean Bridge), 383.
Banffshire (Ben Rinnes), 216, 263, 284.
— (Caun_bach), 93.
— (Inchory), 227.
Caithness-shire (Leaved), 135, 315.
— (Wick), 135.
Cromartyshire (Coigach), 404.
Edinburghshire (Edinburgh), 102, 219.
— (Portobello), 193.
Elginshire (Dalmunach), 265.
— (Huntly), 263.
— (Lossie Valley), 71.
Fife (Aberdour), 364.
— (Balfour Mains), 143, 148, 167.
— (Donibristle), 142.
— (Inchcolm), 121.
— (Pettycur), 353.
Haddingtonshire (Pencathlland), 137.
Inverness-shire (Aberriachan), 218.
— (Ben Nevis), 69, 217, 256, 290, 292.
— (Skye), 217.
Ross-shire (Garve), 290.
— (Lewis), 217.
Selkirkshire (Selkirk), 351.
Shetland (Hildesay), 364.
— (Ben Nevis), 69, 217, 256, 250, 292.
— (Skye), 217.
Ross-shire (Garve), 290.
— (Lewis), 217.
Selkirkshire (Selkirk), 351.
Shetland (Hildesay), 216, 277.
Sutherlandshire (Assynt), 202, 276.
— (Ben Nevis), 69, 217, 256, 250, 292.
— (Laing), 216, 259.
Seismograph, The Milne form of, 110.
Seismology, Recent Progress in, 108.
Seismometer, Construction of, 109.
Selkirk, Outliers of Old Red Sandstone in the Neighbourhood of, 351.
— On Borolinite and its Associates in Assynt (Second Communication), 376.
— Some Scottish Granite-Gneiss Contacts and their Interpretation, 365.
Silica-saturated magmatic solutions, 284.
Simplon Tunnel, Temperatures in, 169, 174.
South Balgray, Deep bore at, 170.
— Hetton, Deep bore at, 171.
Sperenberg, Deep bore at, 172.
Stenhouse, A. G., and R. Campbell, Geology of Inchcolm, 121.
Stuart, D. R., Analyses of Oil-shales, 106.
Stigmatis in limestone, 74.

Tait, D., On Egg-shaped Stones dredged from Wick Harbour, 135.
— — On the Occurrence of Cretaceous Fossils in Caithness, 318.

Terminology of felspathoidal rocks, 377.
Teschenite on Inchcolm, 126.

Volcanic Action, Evidence of, in the Banffshire Schists, 93.
— — Tuffs, Occurrence of, on Ben Nevis, 69.
Vullinite, a new rock name, 406.

Wardie Shales, 102.
— — Analyses of oil-shales in, 106.

Whalley, E. R., Notes on a Glacial Gravel Deposit at Woodhall Colliery, Pencaitland, 137.

Wick Harbour, Egg-shaped Stones dredged from, 135.

Wilson, J. S. Grant, The Results of the Balfour Bore, 143.
— — W., with C. T. Clough, G. W. Lee, and D. Tait, The recently exposed Section South-east of Portobello, 193.

Woodhall Colliery, Glacial Gravel Deposit at, 137.
LIST OF OFFICE-BEARERS

OF THE

EDINBURGH GEOLOGICAL SOCIETY

FOR SESSION 1907-08,

BEING THE SEVENTY-FOURTH.

President.
RALPH RICHARDSON, W.S., F.R.S.E.

Vice-Presidents.
JOHN A. JOHNSTON.
C. T. CLOUGH, M.A.
Dr PEACH, F.R.S.

Honorary Secretary.—DAVID GLOAG.

Treasurer.—A. CAMPBELL, 62 Marchmont Road.

Council.
ROBERT CAMPBELL, M.A., B.Sc.
JAMES BISSET, M.A., F.R.S.E.
J. A. GRAHAM MILLER, W.S.
JAMES CURRIE, M.A., F.R.S.E.
ANDREW G. STENHOUSE, F.G.S.
EDWARD B. BAILEY, B.A.
Dr HORNE, F.R.S., F.R.S.E.
CHARLES ALFRED MATLEY, D.Sc.
JAMES R. REID, C.I.E.

Auditors.—R. C. MILLAR, C.A. and T. K. FARQUHARSON

Orders for the Society's Publications, and all other communications, should be addressed to the Honorary Secretary, Geological Library, India Buildings, Edinburgh.

The **Edinburgh Geological Society** was founded in 1834; but it did not publish Transactions till 1868. Fellows pay an Entrance Fee of 10s. 6d., and an Annual Subscription of 12s. 6d.; or a single payment may be made for Life of £6 : 16 : 6. Life Members and Fellows who have paid Annual Subscriptions to the amount of Two Guineas may receive the Society's Diploma on payment of a fee of 7s. 6d. Candidates for election must be nominated by two Ordinary Fellows.

The Society is supported solely by the Annual Subscriptions of its Ordinary Fellows, and derives no pecuniary aid from Government.
